THRANE & THRANE AWARDED DKK 17 MILLION SYSTEMS CONTRACT

Thrane & Thrane has received a DKK 17 million systems contract from the Japanese communications company, KDDI, one of the worlds leading service providers of Inmarsat airtime. Delivery of the systems is planned for the fall of 2007.

KDDI has decided to invest in new Inmarsat-C Land Earth Station hardware to replace the company's existing equipment located in Yamaguchi, Japan. Furthermore, KDDI has decided to upgrade its existing Inmarsat MPDS Home Land Earth Station with the latest Thrane & Thrane hardware.

Design, development, manufacturing and selling of satellite access stations has been a Thrane & Thrane key business area since 1990. As the leading player in the field, the company delivers high quality turnkey solutions; satellite access stations including interface to terrestrial networks, large disc antennas, RF equipment and access control and signaling equipment.

"Thrane & Thrane leads the market in satellite systems technology and service and has installed over 150 Inmarsat Land Earth Stations all over the world to date," comments Mads Winkler, Sales Manager Systems. "KDDI is a major communications company in Japan, and in choosing Thrane & Thrane is confident of the performance and reliability of the systems we will supply."

About Thrane & Thrane

Thrane & Thrane is the world's leading manufacturer of terminals and land earth stations for global mobile satellite and radio communication. Since its incorporation in 1981, the company has established a strong position within global mobile satellite services based on the Inmarsat system, and today it provides equipment for land-based, maritime and aeronautical use. The company's communication products are sold throughout the world under the brands Thrane & Thrane, EXPLORER and SAILOR, through distributors and partners and as OEM products. The company is listed on the Copenhagen Stock Exchange. Information about Thrane & Thrane can be found at: www.thrane.com.
