THRANE & THRANE TO UNVEIL NEW COMPACT SWIFTBROADBAND SOLUTION AT NBAA 2007

Size, weight and cost are key to widening next generation satcoms market

Thrane & Thrane will at the forthcoming NBAA 60th Annual Meeting & Convention unveil details on a unique new satcoms system. Aero-SB Lite utilizes Inmarsat's next generation aeronautical service, SwiftBroadband, to provide a combined data and voice system that is a compact, lightweight and cost effective satcoms solution for aircraft of all sizes.

As a total cabin solution Aero-SB Lite enables high speed internet up to 332 kbps and simultaneous voice. Its SwiftBroadband data channel is highly flexible, offering users a choice of streaming data on a pay-per-minute basis and the always-on background data where only the data transferred are charged. Add in WiFi and VoiP technology, where users can use their own compatible handsets and the Aero-SB Lite becomes a very attractive option for business aircraft operators.

Though value is key to the SwiftBroadband technology Aero-SB Lite has also been designed to be extremely compact and lightweight. Furthermore it utilizes an Intermediate Gain Antenna (IGA) to ensure a lightweight package with low profile/drag and small antenna footprint on the fuselage, making it suitable for use on lighter aircraft.

“The use of SwiftBroadband technology provides the ultimate in quality of service and enables extremely cost-effective operation in regards to both data and voice costs,” comments Gitte Elsing, Director of Aeronautical Sales at Thrane & Thrane. “Our goal with the Aero-SB Lite is to open new markets for SwiftBroadband and the compact, lightweight and cost effective nature of this new solution will allow us to do just that.”

Thrane & Thrane have entered a partnership with AirCell, a leading North American Iridium satcom solution provider, aimed at introducing Aero-SB Lite to the business and VIP aircraft market. The partnership is for the 2008 introduction of Thrane & Thrane's next generation lightweight and compact SwiftBroadband solution designed to address the communication needs of a very wide range of aircrafts.

To find out more about Aero-SB Lite visit Thrane & Thrane on booth 645 at NBAA 2007.
